

THE HILLS GROUP

In 1948, Fred Hill with his wife Lois, founded Hill TV and Radio Limited. By 1950, the company was suitably poised and took full advantage when TV exploded on the scene. In 1954, Hill's received recognition from the RCA Corporation for the world's first order for a colour TV. From the beginning, it was Fred Hill's conviction that a successful sales organization must be supported by a strong, competent service department - and now more than 60 years later - though the company has diversified and grown with the times - that concept remains an integral part of Hill's business philosophy, carried on by his sons, Dave, Rob and Don.

HILLS VIDEO SYSTEMS

From 1970, Hill's has supplied industry, business, educational and government factions with Closed Circuit TV systems, Presentation and Audio Visual products. Hill's systems analysts are available to determine the needs of your application and supply a full turnkey solution to your requirements. Our location provides showrooms to demonstrate the most up-to-date technologies and regular seminars to keep you informed.

PRODUCTION SERVICES

For more than 25 years, Hill's Studio has contributed award-winning results in television and film production for our many satisfied clients. Our creative staff works with you providing the necessary level of service you require, from preproduction and initial story lines to final edit and release. Hill's will bring you the results!

Peace of mind by avoiding System Down Time

The health and safety of your staff, customers, visitors and property are of paramount importance. The key to providing security to people and property is a dedicated staff.

If your staff utilizes CCTV equipment to provide process/quality control, an effective system is required.

Your staff depends on an effective CCTV video system.

The Technical complexity of Cameras, Recorders and other equipment make maintaining the system a challenge to your staff. As a result maintenance is reduced to having equipment repaired when it fails. Consequently, small items like cleaning, aiming and focusing cameras are not carried out. This causes the effectiveness of your system to degrade over time. Hill's can remedy this by implementing one of our proactive proposals.

Achieve Capital Savings by maximizing component life through Repair and maintenance of CCTV system

Hills can perform inspections on all CCTV equipment including cabling on a regular basis. Ensure optimum performance and keep you informed on the status of your CCTV equipment. By providing a report on work completed and noting possible improvements, Hill's will allow you to make timely decisions on system improvements.

Hill's will repair any faulty CCTV equipment on site or at our Service Centre. If repairs are cost prohibitive new equipment will be quoted. Our factory trained Technicians are certified by Panasonic, March Networks and PTSO. With over 40 years of combined experience, Hill's Technical staff is well suited to handle all of your service needs.

Advise staff of changes to ensure compliance with industry/insurance standards

Hill's will keep you up to date on all new video products offered by a wide range of manufacturers, suggest improvements to systems as technology advances, review camera placement and make recommendations based on over 60 years of experience. We would follow a simplified Service Request System. Hill's would maintain a database and provide you copies as the database is updated.

Flexible Plans

Hills Preventative Maintenance Package can be customized to meet your needs.

- We can provide a technician for one day a week for large systems or for a few hours a year for small systems.
- Weekly complete maintenance service
